 /DurlabhDewangan

## TECHNICAL SKILLS

---

**Coursework** :Data Structures and Algorithms, Object Oriented Programming, Web Development, Database Management Systems

**Languages** : C++, JavaScript, TypeScript, Python, PHP, SQL.

**Technologies & Tools** :React.js, Node.js, Express.js, MongoDB, MySQL, JWT Authentication, Tailwind CSS, Vite, Docker, Postman.

**Platforms & Deployment** :Vercel, Render.

**Version Control & Dev Tools** :Git, GitHub, Nodemon.

**Soft Skills** :Problem Solving, Logical Thinking, Self-Learning, Consistency, Team Collaboration.

## EDUCATION

---

- **Aacharya Panth Shri Grindh Muni Naam Saheb Government PG College** **chhattisgarh, India**  
I am pursuing a Bachelor of Computer Applications (BCA) *May.2025 - present*
- **Swami Atmanand Govt. English Medium School, Kawardha** **chhattisgarh, India**  
*May.2023 - May.2024*

## PROJECTS

---

- ❖ **Restaurant Management System (In Progress)** :Building a real-world restaurant management system that supports table reservations and pre-ordering of food items. The project focuses on scalable backend design, secure user authentication, and efficient data handling for future deployment in a production environment. Tech Stack: MERN Stack (MongoDB, Express, React, Node.js), Firebase OTP Authentication
- ❖ **Social Media Platform (MVP)** :Developed a minimum viable product (MVP) social media platform featuring user authentication, post creation, likes, comments, and a real-time feed. Designed RESTful APIs and database schemas to handle user interactions and content efficiently. Tech Stack: MERN Stack (MongoDB, Express, React, Node.js)
- ❖ **Tech Tale - Full Stack Blogging Platform** :Developed a personal full-stack blogging website where content is managed through an admin panel with secure authentication. Implemented features such as creating, editing, and deleting blog posts with dynamic content loading from a MySQL database. Integrated a contact form and login/logout system to manage access and interactions efficiently. Tech Stack: HTML, Tailwind CSS, JavaScript, PHP, MySQL

## TECHNICAL INTERESTS

---

- Backend development and building scalable server-side systems
- Logical problem-solving and algorithmic thinking
- Database design, authentication, and API development
- Open-source contribution and understanding large codebases
